

# We go beyond the camera

SPECTS is CIM Pharma’s holistic inspection solution that includes a complete software-package for full system integration. SPECTS ensures our clients the right documentation, superior testing, complete validation, and full compliance-readiness to international standards.

## Choose an integrated solution

Inspection is at the heart of production in the pharma industry, and inspection solutions must be able to integrate with a variety of systems to deliver optimal performance. SPECTS works with any pre-existing system and can be configured to meet any project specific inspection requirements.

## SPECTS includes everything

- User Management system with integration to corporate domain and AD
- Trail system that meets audits from regulatory authorities
- CFR21 part 11 compliance readiness
- Flexible recipe-based inspections
- Intuitive user interfaces
- Full documentation package
- Industrial grade vision components

## Covers all relevant pharma assembly and packing stations

- Mix-up test
- Assembly guidance
- Assembly control
- Device inspection
- Label verification (device label, shipper box label)
- Label on Device inspection
- Aggregation verification
- Tamper Evident inspection

## Ensures compliance

- Meets all international standards like ISO/IEC 15415
- Available for all OCR/OCV and 2D matrix code technologies
- Enables you to distribute and sell your products globally

## Bottom-line benefits

- Compliance to international standards guaranteed
- Plug-and-play technology
- Minimal impact on OEE
- Dedicated partner
